QUALITY SWEET PEAS

We are headquarters for all the latest and most up-to-date varieties of Sweet Peas, and made a specialty of this grand annual. Our collection has been thoroughly revised, synonyms and out-of-date varieties have been eliminated, wherever practicable, and only those of real merit retained. When you stop to consider that there are nearly six hundred named varieties, you will doubtless pick one or two that you have known. No doubt we could procure you this variety; we could certainly send a variety equally as good.

The Spencer or Oriel-flowering types are exceedingly popular and all the varieties that we offer can be relied upon to come true to color and description. The "Unwins" are all good, and many grandiflora varieties are still holding their own.

If collections are wanted for exhibition purposes, we shall be glad to make suggestions.

At the exhibition of the National Sweet Pea Society of America, held in New York City, July 12 and 13, 1910, we were again awarded the

C. C. MORSE CO.'S SILVER CUP

for the Largest and Finest collection of Sweet Peas, open to the trade only.

NOVELTY SWEET PEAS

Maud Holmes

Sunproof Crimson Spencer (Holmes, 1910)

This is undoubtedly one of the finest novelties of recent introduction; flowers are of the largest size, three and four to a spray, carried on long stems, of brilliant crimson, and blooms are of the true Spencer type, both standard and wings being well waved. This variety will not burn under the hottest sun, is of vigorous and strong growth. The stock is fixed as is shown by The National Sweet Pea Society's trials in England. Pkt. 15 cts., 4 for 50 cts. (See illustration.)

Ethel Roosevelt

is a true waved variety of the largest and most perfect Spencer type. The ground color is a soft pleasing primrose, or straw color, overlaid with dainty flakes and splashes of blush-crimson. The crimson is not at all without burn and simply gives some warmth and golden tinge to the yellowish ground work. Pkt. 15 cts., 4 for 50 cts.

Florence Nightingale

The flowers are truly magnificent and of immense size. The standard is unusually large and broad, pronouncedly waved, yet standing erect and broad, frequently measuring two inches across. The color is most charmingly soft and yet rich lavender, which is enlivened by a very faint sheen of rose-pink. It is practically a self color, and blooms beautifully. Pkt. 15 cts., 4 for 50 cts.

Emily Eckford Spencer

Mrs. Hugh Dickson

(Dobbie, 1909.) A cream-pink Spencer on buff ground, very fine form; flowers well placed on long stems, Award of merit, N. S. P. S., 1910. Pkt. 15 cts., 4 for 50 cts.

Doris Burt

(Wein, 1909.) The color is a most brilliant light scarlet, slightly shaded cerise. For exhibition or table decoration it is excellent, and is quite the best of its class. Pkt. 15 cts., 4 for 50 cts.

Masterpiece

(Malcolm, 1908.) The color of the flower is a rich lavender, of true Spencer type, flowers very large, well waved, remarkably free-flowering. Award of merit, N. S. P. S., 1910. Pkt. 15 cts., 4 for 50 cts.

Tuckswood Favorites

The flowers are extremely large, of the true waved Spencer type, and have a most pleasing color effect.

The background is quite a deep primrose, flushed with rose. The flowers are all of good substance, borne three and four to the stem. The strong dark green stems carry well the gigantic flowers. Pkt. 15 cts., 4 for 50 cts.

Rose du Barri

Emily Eckford Spencer

This new grandiflora affords an entirely new shade in Sweet Peas. The name itself suggests the color, which is a lovely combination of deep, rich, carmine-black and orange. It is unique and distinct, a charming flower of deep rose color, overlaid with a lovely sheen of terra cotta. Foliage and flower very dark green. One of the best decorative Peas ever introduced. For artificial light it is unsurpassed. Pkt. 15 cts., 4 for 50 cts.

Collection, one packet each of the above 10 varieties, for $1.25

Sweet Pea Maud Holmes (Spencer)

Collection, one packet each of the above 10 varieties, for $1.25.
BODDINGTON’S Quality SEEDS

Countess Spencer Hybrids, 1910 and Recent Introductions

The Spencer varieties of Sweet Peas are fast superseding the Grandiflora types of the same variety and color, and are indispensable in a collection whether for exhibition or cut flower purposes. The following list is the cream of the beautiful creations of the hybridizer’s art, and can be relied upon to come true to type and description.

ASTA OHN SPENCER. This variety is lavender, suffused or tinted with mauve, and will undoubtedly take its place as the best lavender. Trade pkt. 15 cts., oz. 25 cts., ¼ lb. 75 cts., lb. $2.

APPLE BLOSSOM SPENCER. The form is most beautiful; the petals are waved and wrinkled to a remarkable degree with distinct serrations on edges of standard. Trade pkt. 15 cts., oz. 25 cts., ¼ lb. 75 cts., lb. $2.50.

AURORA SPENCER. The ground color of the flower is cream-white and this is exquisitely tinted and mottled with rich orange-salmon. Trade pkt. 15 cts., oz. 50 cts., ½ lb. $1.50, lb. $5.

AMERICA SPENCER. A grand variety like America, but of the Countess Spencer type, and very large flowers, generally four on a stem. Trade pkt. 15 cts., oz. 55 cts., ¼ lb. $1, lb. $3.

BLACK NIGHT SPENCER. Very dark bronze. Trade pkt. 15 cts., oz. 25 cts., ¼ lb. 75 cts., lb. $2.50.

BLANCHE FERRY SPENCER. Pale rosy standard; white wings. Trade pkt. 15 cts., oz. 25 cts., ¼ lb. 75 cts., lb. $2.50.

COUNTCESS SPENCER. Bright, clear pink, showing a little deeper at the edge. The form is open and the margins of the petals are wavy. Trade pkt. 10 cts., oz. 15 cts., ¼ lb. 35 cts., lb. $1.

DAINTY SPENCER. In a bud state it looks like a pale primrose self, but when opening first appears to be white, but quickly changes to white with a pink edge defined at the back, making a most charming contrast. Generally three but often four flowers on a stem. This variety does best cut in a bud state and opened in water. Trade pkt. 15 cts., oz. 50 cts., ¼ lb. $1.50, lb. $5.

FLORA NORTON SPENCER. This is a bright blue, with a little tint of purple, perhaps a little more than the original Flora Norton. Trade pkt. 15 cts., oz. 55 cts., ½ lb. $1, lb. $3.

GAITRED SPENCER. Striped with rosy magenta. Trade pkt. 15 cts., oz. 35 cts., ¼ lb. 90 cts., lb. $3.

GEORGE STARK (SPENCER). The standard is nicely waved and upright, but owing to the thickness of the petal is not so crinkled as some of the Spencers. Trade pkt. 25 cts., 5 pkts. $1, oz. $2.

JUANITA SPENCER. White striped with lavender. Trade pkt. 15 cts., oz. 25 cts., ¼ lb. 75 cts., lb. $2.50.

KING EDWARD SPENCER. The nearest approach in color (carmine) to the popular King Edward VII in the waved or Spencer type. Trade pkt. 15 cts., oz. 25 cts., ¼ lb. 75 cts., lb. $2.50.

LOVELY SPENCER. Bright pink at the throat, or rather the base of both standard and wings, and shades to soft blush and almost white at the edges. Trade pkt. 15 cts., oz. 25 cts., ¼ lb. 75 cts., lb. $2.50.

MRS. WALTER WRIGHT SPENCER. A magnificent rose mauve. Trade pkt. 15 cts., oz. 25 cts., ¼ lb. 75 cts., lb. $2.50.

MRS. ROUNTZAHN SPENCER. The blending shades are soft rose and buff and primrose, with a decided rose edge. Trade pkt. 15 cts., oz. 25 cts., ¼ lb. $1, lb. $3.

MRS. SACKLEY SPENCER. Any one familiar with the old Favorite, Mrs. Sackley, will at once recognize this as a “Black-Seeded White” Spencer of perfect form. Trade pkt. 15 cts., oz. 25 cts., ¼ lb. 50 cts., lb. $1.75.

Collection one packet each (containing 50 seeds, except where noted) of the above Spencer Peas, 34 varieties, for $4.00, 2 sets $7.50.

Collection one ounce of each of the above varieties for $12.00. 2 collections for $22.50.

Boddington's Flower-Seed Novelties and Specialties

RECENT INTRODUCTIONS

While every year we look upon the flower-seed novelties placed upon the market with more or less scepticism, we must not overlook the fact that all the really good things of today were novelties at one time, and were looked upon with as much, or perhaps more suspicion than the novelties of today.

There are many novelties offered this year from different sources, but it is our endeavor to select only those we know something about, have seen, or that are highly recommended from sources other than the disseminator. The descriptions are those of the introducers. You cannot afford to be without some of these really good introductions.

The New Ostrich Plume Celosia

Pride of Castle Gould

Celosia Pyramidalis Plumosa Hybrida Castle Gould (Pride of Castle Gould)

AWARDS: Large Silver Medal at the National Flower Show, Chicago, III., 1908; First Class Certificate, New York Florists' Club, 1907, Special Diploma of Merit at the Mineola Fair, 1907, and numerous first premiums.

The Ostrich Plume Celosia, "The Pride of Castle Gould" is an entirely distinct type of the Celosia pyramidalis plumosa, and surpasses by far anything thus far placed on the market. This strain has, through constant culture and careful selection and hybridization, proven its superiority to anything similar ever offered. The following strong points speak for themselves:

HABIT OF PLANT. Pyramidal, compact growth of from two to three feet, with immense extra-fine feathered heads give the plant a most striking and unique appearance.

The flowers being of such bright and intense color, and the plant of erect growth and beautiful foliage, it creates the greatest admiration, wherever shown, and establishes a demand for itself that every plant lover must appreciate.

COLOR. The plumes are of many beautiful self-shades, including Blood-red, Real Carmine, Golden Yellow, Salmon, Deep Scarlet, Dark Orange, and Wine-red. When fully developed, the tips of the plumes attain a lovely golden tint, the combination being very attractive and distinctive; however, by variation there will be found many more shades; the self-coloring will be surprising.

DECORATIVE VALUE. As a pot plant, with its quick-growing habit, we believe there is no finer plant known at the present time, wherefrom in the course of six months a most excellent stock of salable plants in every size can be obtained. As a bedding plant, it cannot be equalled by any other annual for its profusion of flowers and variety of striking colors, and we consider it the Queen of all Decorative Annuals where the showing of groups is desired, and when given a sunny exposure it will develop to its highest perfection. We offer seed for the first year raised strictly from pot plants. All packets we send out will contain a mixture of the above colors.

PRICE PER TRADE PACKET, 50 CENTS. 3 PKTS. FOR $1.25

Cultural directions by Mr. Harry Turner, the originator of this grand novelty, the head gardener at Castle Gould, the home of Howard Gould, Esq., Port Washington, N. Y.

Sow thinly in pans of prepared soil in May or June and place in a warm house, temperature 60° to 70°, to germinate. Pot up in 2½-inch pots when 1 to 2 inches high. Transfer to 4-inch pots as soon as ready, adding the soil richer each time, then to 6-inch and finally to 8-inch pots if very large specimens are required. 6-inch pots are large enough to produce fine plants. Most useful for decorations. Grow warm, shade lightly in the warmest weather, and give plenty of water and feeding during the development of the plant. When the plumes have attained their full size a cooler temperature will keep them a long season in fine condition.

For bedding, sow first week in May and plant out of 4-inch pots. The results will charm the most critical admirer of flowers producing a blaze of color till killed by frost.

The amateur without glass may have equal success a little later in the season by sowing very thinly in prepared soil in the open garden when danger from frost is over. Lift with a little earth attached, and plant out in permanent quarters about a foot apart.
The Gigantic Orchid-Flowering Cosmos

BODDINGTON'S

LADY LENOX (H.A.)

This Gigantic Cosmos is the forerunner of an entirely new race of Cosmos. It is of extraordinary size and beauty.

Size of flower, 1 to 5 inches in diameter, which is about three times larger than the ordinary Cosmos. Color a delightful shell-pink, lighting up beautifully at night. Form of flower, oval petals of splendid substance, forming a perfectly circular flower which, when cut, lasts an unusual length of time in water. Habit of plant, strong and vigorous, growing 6 to 7 feet high. Flowers may be cut with any length of stem up to 5 feet. Trade pkt. 15 cts., oz. 50 cts., 1 lb. $1.00; 1/2 lb. $1.50, 1 lb. $2.50.

ASTERS

Aster, Lady Roosevelt. H.A. A chrysanthemum-flowered Aster of the Darwin strain. The flowers resemble the incurving chrysanthemum; the color is a gorgeous pink, of marvellous beauty. The mammoth growth of plant insures extra-long stems; we have grown stems 10 inches long; 20 to 30 inches long is very ordinary for Aster Lady Roosevelt, and the flowers are very large. Pkt. 15 cts., $0.25 for 25 cts., 1/4 oz. $1.50.

Aster, Hercules Brilliant Rose. H.A. The Hercules Aster certainly represents the highest achievement of horticultural endeavor in this ever-popular flower. Varying in height from 18 to 20 inches, the plant throws up sturdy, thick stalks, crowned with gigantic flowers of the most perfect curbed and waved chrysanthemum type, measuring often 6 inches or more in diameter, a size attained by no other Aster in cultivation. Pkt. 35 cts., for $1.

The following five beautiful varieties are seedlings of the well-known Daybreak and Purity, and are bound to find favor with all lovers of this beautiful class.

Aster, Lemon Drop (Yellow Daybreak). (Novelty, '90) H.A. A real yellow Aster at last. It is a decided yellow, and as good a grower as any of the other varieties of the Daybreak class. The flowers are not quite so large as those of Purity, its parent, but are more perfect and symmetrical in form, in fact the petals are laid so perfectly that the flowers have a wax-like appearance. Trade pkt. 15 cts., 1/2 oz. 60 cts., 1 oz. $1.00, 1/2 oz. $1.25, oz. $5.00.

Aster, America (Imp. Pink Daybreak). (Novelty, '89) H.A. Strong robust grower, producing flowers of the largest size on very strong, stiff stems. In color it is somewhat darker than Daybreak, quite resembling the shade known as old rose. The flowers are of great substance and very lasting after being cut, more so than most other varieties. A valuable feature is its lateness of blooming, being fully two weeks later than Daybreak. Trade pkt. 15 cts., 1/2 oz. 50 cts., 1 oz. 75 cts., 1/2 oz. $1.25, oz. $2.50.

Aster, Salmon King (Salmon Daybreak). (Novelty, '89) H.A. In this variety we have a splendid addition to the Daybreak class. The color is not only novel, but of a very pleasing shade, bright enough to make it allways conspicuous, although modest and unassuming in appearance. The habit of growth, form of plant and flower are identical with those of its parent, Daybreak. Trade pkt. 15 cts., 1/2 oz. 50 cts., 1 oz. 75 cts., 1/2 oz. $1.25, oz. $2.50.

Aster, Rosy Morn (Rose Daybreak). (Novelty, '90) H.A. This is a very beautiful variety. The flowers are of a handsome shade of rose, large, well formed, double to the center and produced in the same profusion as the other Asters of this class. We consider it one of the best of the Daybreak type. Trade pkt. 15 cts., 1/2 oz. 50 cts., 1 oz. 75 cts., 1/2 oz. $1.25, oz. $2.50.

Aster, Lavender Daybreak. (Novelty, '90) H.A. The habit of growth is similar to that of Daybreak, but the flowers are somewhat larger in size, always full to the center and of a most beautiful shade of lavender. Trade pkt. 15 cts., 1/2 oz. 50 cts., 1 oz. 75 cts., 1/2 oz. $1.25, oz. $2.50.

Collection of the above five grand Novelty Daybreak Asters, 1 pkt. each for 50 cts., 3 collections for $1.25.

Aster, Crego H.A. The Crego Asters are of American origin and are very strong growers, attaining a height of from 2 to 3 feet, with long, strong stems. The flowers are of a mammoth Comet type, measuring from 1 to 3 inches in diameter and resembling large Chrysanthemums. Tr. pkt. 1/4 oz. 1/2 oz. 1 oz.

Aster, Vick's New Early Non-lateral Branching.
H.A. The Early Branching come into bloom about two weeks earlier than the Late Branching. We offer two colors only, Early Branching White, Early Branching Rose. Each, Trade ppt. 25 cts., ½ oz., $1.25, oz., $2.

Aster, Rosy Car. H.A. The flowers are large white full center, well covered, petals flat and rounded. Color a rich shade of Royal Purple. This variety is distinct in growth from the Branching Aster. The side stems start from the main stem close to the ground, instead of branching out from the main stem at various heights as in the branching Aster. It is a medium to late. Trade ppt. 25 cts., ½ oz. 50 cts., ¼ oz., 50 cts., ½ oz. 80 cts., oz. $1.50.

Cactus Aster, Rosy Car. H.A. Of pyramidal habit, the plants branch a few inches over the ground and throw out 15 to 20 strong side shoots, each bearing in graceful horizontal pose a most refined flower. The petals, nearly two inches long, are characterized by being slightly bent or twisted near the tip and thus lead to the flower a kind of Cactus-like aspect, quite different to all other known classes. Trade ppt. 25 cts., 5 pks for $1.

Aster, Victoria Carmen
H.A. An entirely distinct color, which appears for the first time in Asters, and may perhaps be best described as dark salmon, besotted with white. Trade ppt. 25 cts., 5 pks for $1.

Choice Asters of Recent Introduction

The following varieties have all been tried, and from personal observation and report are worthy and have become very popular in their respective classes.

Daybreak. Flowers very large and double, of a beautiful shell-pink color. This is a grand Aster for cutting purposes, growing 2 feet high. One of the best late market Asters of its color. Trade Pkt. 35 cts., oz. $2.25.

The Favorite. An aristocrat among the Comet Asters. Color beautiful blush, changing to rich deep pink as the flower becomes older; the petals wavy reflexed. The plants grow 18 inches high, bearing large-sized blooms of beautiful form; invaluable for cutting. Trade Pkt. 25 cts., oz. 60 cts., oz. $2.25.

Purity. One of the most beautiful of the Branching Asters. Double flowers of glistening pure white; similar to Day-break in form and habit of growth. Trade Pkt. 35 cts., oz. $2.25. (See Illustration.)

Miss Roosevelt (Victoria). The flowers of this new Aster are of a clear primrose tint, which after some time changes to a delicate flesh-color, like that of the popular Glioire de Dijon rose. A splendid cut-flower. Trade Pkt. 35 cts., oz. $1.50.

Vick’s Mikado. An entirely new class of Branching Asters, growing from 16 inches to 2 feet high, and bearing immense curled and twisted flowers on long, stiff stems, resembling in a distance, huge, ragged Japanese Chrysanthemums. Trade Pkt. 35 cts., 1 oz. 75 cts., oz. $2.50.

Snowdrift. Certainly one of the earliest Asters in cultivation. The entire energy of the plant seems given to the production of slender, upright stems 12 to 20 inches long, crowned with immense feathery flowers. Trade Pkt. 35 cts., 1 oz. 75 cts., oz. $2.50.

Giant Comet, Ruby. The finely curled flowers, resembling a Chrysanthemum, are raised upon long stems, and open in a glowing scarlet, turning at the close of the period of flowering into dark scarlet. Trade Pkt. 35 cts., oz. $2.50.

Giant Comet, Queen of Spain. Primrose, turning to a rich blush, it has the same beautiful effect of coloring as Miss Roosevelt, in the Victorian class. Trade Pkt. 35 cts., 1 oz. 75 cts., oz. $1.
CHOICE ASTERS OF RECENT INTRODUCTION.—Continued

Giant Comet. White, changing to Amethyst-blue. Extremely delicate new color of this beautiful tall-growing class, with large, double, long-petaled, curly flowers, which appear pure white in opening, changing as the flower is developing, to a clear light blue tint of a wonderful pleasing effect. Trade pkt. 55 cts., 3 for $1.

Vick's Violet King. The peer of the grandest Chrysanthemum. The habit is similar to the popular Vick's Branching, vigorous in growth, long, stiff stems; petals somewhat resemble the grouped varieties, but much larger and broader, completely covering the crown. In shape and size, the bloom is round, full and large, many of the flowers 1 to 5 inches. Its color is a soft violet-blue. Trade pkt. 50 cts., oz. $1.50.

Lavender Gem. A beautiful variety of Aster, of the Comet type, with large, loosely arranged flowers, which are perfectly double, and of a beautiful, delicate shade of lavender. Flowers are borne on long stems, and are excellent for cutting. Trade pkt. 55c., oz. $2.00.

Hercules, White. Of imposing aspect, the plants throw up a very strong stem, 15 to 20 inches high, which begins to branch about 4 inches from the ground. Flowers are borne on remarkably strong stalks, are all the purer white, of the genuine Hohenzollern form, with very long petals, and attain the enormous diameter of 6 or 8 inches. Trade pkt. 25 cts., oz. $2.00.

Cardinal. The color is, as its name implies, a beautiful shade of cardinal. The growth rate is similar to the Branching Asters, but somewhat dwarfer, but not so dwarf as to prevent its being one of the very best varieties for cutting purposes. Trade pkt. 25 cts., 1/4 oz. 60 cts., oz. $2.00.

Sunset. A seedling from Daybreak. The habit of the plant is the same as the well-known varieties Daybreak and Purity. The color of the flowers is a delicate shade of light pink, shading to a rich pink in the center, making a beautiful combination of colors in one deep flower. The flowers are globe-shaped and are borne on long stems in profusion. Trade pkt. 32 cts., 1/4 oz. 60 cts., oz. $3.00.

Aster, Dawn of Day. The earliest flowering Aster. Will flower by June 15, and if freely cut will continue to bear blooms until late in fall. Branching in habit, and pure white in color. Flowers are large and very double. Trade pkt. 35 cts., 1/4 oz. $1.25, oz. $1.00.

Aster, Crimson King. It has all the good qualities of Vick's late Branching type, with extra large, densely double flowers, few under 5 inches across, on stems 15 to 18 inches long, in color a very rich blood-crimson, full of fire, making a brilliant bed or border, and very desirable for cutting, the color showing up well under artificial light. Trade pkt. 35 cts., 1/4 oz. $1.25, oz. $1.00.

Aster, Pink Beauty. A magnificent variety of strong, free, upright growth, 24 to 30 inches high, blooming from early in August until well on in September, with frequently as many as fifty flowers open at one time on long, strong stems, and averaging 4 inches across, of chrysanthemum shape, the inner petals incurved, outer reflexed; color a soft, delicate blush-pink; a shade that is always in demand for cutting. Trade pkt. 35 cts., 1/4 oz. $1.25, oz. $1.00.

Aster, Diadem. H.A. The plant grows about 10 inches high, and bears a profusion of double flowers of rather small size, two or three outer rows of petals being pure white, and forming a distinctly defined band in charming contrast to the inner petals, which are bright rosy crimson, deepening to rich purple-crimson toward the center. Trade pkt. 25 cts., 1/4 oz. 35 cts., 1/2 oz. $1.50, oz. $2.00.

Calceolaria, Boddington's Perfection (See page 14)

BODDINGTON'S PRIZE SINGLE, MIXED

Our seed has been saved from remarkably fine double-flowering plants, including all the most beautiful colors. 50 pkt. 60 cts., pkt. $1.
Calcocola Hybrida, Boddington's Perfection

The herbaceous Calcocola is an easily cultivated plant. So long as frost is excluded from the plants in winter they are perfectly safe, and to attempt to hasten growth at any time is a failure. July is the best month for sowing the seed. The great advance made in the habit of the strains offered is remarkable, whilst in the color there is a marked improvement. Saved by England's most famous specialists. Monster flowers of rich and varied colors, including spotted, bicolored, and self-colored varieties. 1/2 pkt. 60 cts., pkt $1.

**Buddington's Matchless Cinerarias**

In the culture of the Cineraria the one mistake so often made is that of sowing the seed too soon. The plants thus raised, more often than not, make a rank growth; this is not in any sense desirable. Sturdy plants with leaves of medium size are best.

CULTURAL DIRECTIONS

Take a clean 5- or 6-inch pot, or 6- to 7-inch pan, and fill it to within 2 inches of the top with coarse ashes; on top of this put about 1 1/2 inches of fine soil and firm down; give good watering with boiling water, using a fine rose; after drying off a little, sow the spores but do not cover; put in a saucer filled with water placing a pane of glass over the pot or pan. Never top-water. After first real leaves appear they should be pricked out into flats.

Boddington's
Matchless Giant Primulas

PRIMULA SINENSIS

Our Primula Sinensis seed has been specially grown for us by the most celebrated English Primula specialist. The flowers are remarkable, not only for size, beauty and brilliancy of the colors, but for the great substance of the petals. Considerable care is necessary in order to secure the successful germination of the seed of the choice kinds of P. Sinensis. The most suitable periods for sowing are January to May for autumn, and June to August for spring blooming. Shallow pans, well drained, are the best, the soil consisting of sandy loam and leaf-mold, worked through a fine sieve; the pans when thus prepared, should be well watered before the seed is sown. Only a slight covering of soil or sand is needed. What has most to be guarded against is drought; the soil should be kept in as equable degree of moisture as possible, never being on the dry side. We attribute more failures to this cause than to any other. Just at the time when the seed commences to germinate the least departure from this is fatal.

**"Quality is Remembered Long After Price is Forgotten"**

**WHAT QUALITY MEANS**

Quality means the best and finest types procurable in their respective classes. We go to specialists for our flower seeds. Our customers, the florist, the private gardener, demand the highest grade. We have no cheap catalogue trade. "Quality" may mean a little higher price. "Quality," in fact, means "quality," and we know that when you buy from us you get it—and our customers know it too.

**GLOXINIA ERECTA SUPERBISSIMA**

Having during the past season been requested to secure some specially fine Gloxinias for exhibition purposes, we have made arrangements with a noted Gloxinia specialist in England to reserve for us some of the most distinct types. The bulbs are not so large as the Named Varieties, but this is a characteristic of most Erecta superbissima varieties.

**BODDINGTON'S IDEAL PRIZE GIANT MIXED.** Great variety of superb colors.

**CYCLOPS.** Velvety carmine, shading to a broad white border, throat dotted with dark red.

**DUCHESS OF YORK.** Flowers of a rich dark blue, each petal being edged with a broad band of white. A most striking and lovely variety.

**SPOTTED HYBRIDS.** Whenever exhibited, they create intense interest. The delicate markings, in an infinite variety of forms, add a special charm to the flowers.

**DUKE OF YORK.** Large scarlet Gloxinia with deep white edge to each petal. A magnificent flower.

**HER MAJESTY.** This exquisite Gloxinia is still unsurpassed by any other white variety. The flowers are as pure as newly fallen snow, and are borne on short stems, just clear of the elegantly recurved foliage.

**READING SCARLET.** In color this is the most brilliant Gloxinia in existence, being an intense glowing scarlet variety of the true Crasifolia habit. An admirable companion to Her Majesty.

$2.00 per doz., $15 per 100.

Iris Kaempferi, Eclaire
Miscellaneous Bulbs

Lycoris squamigera, or Amaryllis Hallii

(The Magic Lily of Japan)
A perfectly hardy Amaryllis, producing beautiful pink flowers. One of the hardy Amaryllis never widely introduced and almost lost to floriculture.
Lycoris squamigera produces in early spring foliage which grows until July, when it ripens and disappears, and one not familiar with its habits would think the bulb had died, but about a month later, as if by magic, the flower-stalks spring from the ground to a height of 2 or 3 feet, developing an umbrella of large and beautiful lily-shaped flowers 3 to 4 inches across and from eight to 12 in number, of a delicate lilac-pink.
As the bulb is perfectly hardy without any protection, it can be planted either in the fall or spring. Cover the crown about 4 inches. Very useful for cut-flowers in the summer.

Strong blooming bulbs, 10 cts. each, 65 cts. per 12, $5.50 per 100.

Amaryllis tuberosa (Tuberosous-rooted Wisteria). Clusters of rich, deep purple flowers, which have a strong, delicious violet fragrance. Tubers, 20 cts. per doz., $1.50 per 100, $12 per 1,000.

Calla Elliottiana. This is the great new Yellow Calla of magnificent beauty. Flowers are large, rich dark golden yellow, often 4 to 5 inches across the mouth; leaves are beautifully spotted with white. bulbs of this variety are very scarce. Extra large bulbs, 25 cts. each, $2.25 per doz., $17 per 100.

Eremurus Himaliacus. Majestic, tuberosous-rooted plant. A noble ornament in flower-garden or on the lawn. The individual flowers, of peach-pink color and very fragrant, are closely arranged on stalky spikes 6 to 10 feet high, forming a magnificent column of bloom during June and July. Give a sunny position, sheltered from gales; plant the tubers in the fall, while dormant, and set about 8 inches deep. Although hardy, it will be safer in Northern States to protect with 4 or 6 inches of leaves, straw, manure or similar covering, to prevent the young growth, which starts very early, from being nipped from late freezes. Strong flowering roots, 40 cts. each, $1 per doz.

Robustus. Delightful rosy pink. 40 cts. each, $1 per doz.

Bungei. Beautiful golden yellow. One of the leastest and most lovely of the Eremurus, $1 each, $10 per doz.

Bolusianus. Soft pink, with hands of deeper color down the middle of segment. 75 cts. each, $3.75 per 100.

Incavillara Delavayi (Hardy Gloxinia). This comparatively new perennial from northern China, has been found hardy in the United States. We recommend, however, a liberal melting where left out during winter. The tubers may be lifted in autumn and stored in the same manner as dahlias, and replanted in spring. The foliage resembles that of the acanthus, while the blooms appear like clusters of pink gloxinias. It is extremely decorative. Strong roots, 10 cts. each, 75 cts. per doz., $5 per 100.

Oxalis (Summer-Flowering) Deppei. Pure white; very fine.
Lasandra. Fine rosy pink, beautiful cut foliage.
Shamrock. Lovely clover-like foliage and pink blossom.
Mixed Colors. Several colors.
10 cts. per doz., 35 cts. per 100, $2.50 per 1,000.

Pancratium (Spider Lily). This grand Spider Lily forms large imposing clumps, and are a mass of clustered heads of pure white, fragrant flowers. The flowers are borne in large clusters, are of waxy whiteness and unsurpassed fragrance. Fine flowering bulbs, $1.25 per doz., $10 per 100.

Spiraea palmata rosea. The beautiful deep pink hardy Spiraea, $1.00 per doz., $7.00 per 100.
Spiraea Aruncus. The grand hardy white Spiraea. 4 to 5 feet. $1.00 per doz., $7.50 per 100.

Tigridias, Giant California. We are introducing a strain of California-grown Tigridias, the bulbs of which are very large, solid and vigorous. These fine bulbs keep perfectly well over winter under ordinary conditions, whereas smaller ones dry out and decay. They also make a remarkably strong and vigorous growth, blooming early and with remarkable profusion.

Boddington’s New Hybrids. Giant flowers of red, white, yellow, orange, rose, crimson and gold, with shades and combinations of color never shown before by Tigridias.

Hybrid Roses, Crimson Ramblers, Etc.

The right time to buy Roses is when they are fresh and well ripened. Roses potted up in the Winter become better established and force better, and are more satisfactory in every way, and you can retard or force at your leisure. We recommend the American-grown "Ramblers." Don't attempt to force imported Ramblers; the general experience is that they are failures.

**Flower of Fairfield**

The Everblooming Crimson Rambler

For many years it has been the aim of Rose growers to raise a Rambler which would be everblooming. We are pleased to say that we can offer such a Rose this season. This variety is a sport from the beautiful Crimson Rambler, is similar in color, more brilliant and lasting than the old variety. It also possesses the further advantage over the Crimson Rambler in the fact that it flowers profusely on the young wood the first year. Flower of Fairfield is a vigorous grower and free bloomer. It starts to bloom early in the spring and continues until late in the Autumn. It is rightly termed "perpetual blooming." This variety is a grand addition for covering walls, trellises, arches, etc., besides being very useful as a cut flower. 25 cts. each, $2.25 for 10, $20 per 100.

**Veilchenblau (Violet-Blue).** It has long been the desire of rosarians to secure a blue Rose. In Veilchenblau we have practically approached this color. The steel-blue flowers of this new Rose appear in large clusters, are semi-double, of medium size and keep in bloom a long time. The showy yellow stamens contrasting with the blue flower, give the whole a striking appearance. 10 cts. each, $3.75 for 10, $35 per 100.
